Closed Registration System

The Canine Association pure bred dog registry is a closed register, i.e. will only hold the registration details of dogs with accredited overseas export pedigrees or Bahraini registered dogs with more than 3 generation behind them. The registration system starts with BCR (Bahrain Closed Registration) and then will be followed by a special numbering system.

Open Registration System

This system is for dogs that do not have all their proper paperwork in the case of documents being lost or that the previous owners have sold the dog with the wrong documents.

These set out the conditions for the registration of dogs including:

- Recognition and classification of breed by 3 Accredited professional dog judges
- The register and the registration of the dog
- To be given a Kennel Name
- Transfers, endorsements, leases, imports and exports documents
- Setting of registry fees

Dogs that have completed the requirements of their entry into the open registration system will have a registration system starting with CBO (Canine Bahrain Open) and then this will be followed by a special numbering system. All dogs that complete 3 generations of being registered by the Canine Association of Bahrain will then be transferred after the final decision of the Executive Committee to the closed system.
